Asansol, West Bengal, India | +91-6295199077 | suvankarpayra12@gmail.com

GitHub: github.com/suvancodes | LinkedIn: linkedin.com/in/suvankarpayra

Portfolio: myportfolio.vercel.app

EDUCATION

B.Tech in Computer Science & Engineering

Kazi Nazrul University, Asansol | 2024 – 2028 | CGPA: 7.8

TECHNICAL SKILLS

Programming: Python, C++, SQL

Data Science: NumPy, Pandas, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis

Machine Learning: Linear Regression, Logistic Regression, KNN, Decision Trees, Random Forest, SVM, Gradient Boosting, AdaBoost, Model Evaluation, Cross-Validation

Deep Learning & NLP: ANN, TensorFlow, Keras, Text Preprocessing, Tokenization, Vectorization, Word2Vec

Data Visualization: Matplotlib, Seaborn, Tableau, Dashboard Development

Databases: MySQL, SQLite

Tools: Jupyter Notebook, Git, GitHub, VS Code, Streamlit, Flask

Other: Data Structures & Algorithms

PROJECTS

FraudShield AI — End-to-End SMS Spam Detection System

([GitHub](#) | [Live Demo](#))

- Built an end-to-end NLP pipeline covering text preprocessing, feature engineering, model training, evaluation, and deployment.
- Applied NLTK preprocessing, **Word2Vec embeddings**, and **SMOTE** resampling for SMS classification on imbalanced data.
- Trained and compared Logistic Regression, Random Forest, Gradient Boosting, AdaBoost, Decision Tree, and KNN models using **Precision, Recall, and F1-score**.
- Developed and deployed a **Streamlit** application for real-time SMS spam classification.

Sales & Product Performance Analytics

([GitHub](#))

- Built an analytics pipeline on **150K+ e-commerce transactions** using Python and Pandas for data cleaning, KPI engineering, and feature computation.
- Engineered business metrics including **7-day rolling revenue**, **monthly growth %**, **Pareto (80/20) SKU contribution**, **revenue by source**, and **geographic revenue share**.
- Used **MySQL** with GROUP BY, JOIN, subqueries, CTEs, and window functions to analyze monthly revenue, country-wise performance, and product rankings.
- Generated dashboard-ready datasets and visualization reports to support revenue optimization and product prioritization analysis.

Bank Customer Retention Predictor

([GitHub](#) | [Live Demo](#))

- Built a deep learning-based customer churn prediction system using **TensorFlow** and **Keras** to identify customers at risk of leaving.
- Performed data preprocessing, feature encoding, and model training on customer demographic and banking behavior data.
- Designed and trained an **Artificial Neural Network (ANN)** using dense layers, ReLU activation, and binary classification.
- Developed and deployed an interactive **Streamlit** application for real-time customer retention prediction.

CERTIFICATIONS

- **Complete Machine Learning & Data Science Bootcamp** Udemy | Jun 2025 – Feb 2026 ([view certificate](#))
- **SQL for Data Analysis** –Simplilearn, 2026 ([View Certification](#))
- **Introduction to MS Excel** – *Simplilearn (SkillUp)* |2026 ([View Certificate](#))
